

**CHANGE A GRATE FILTER ON A CANADIAN SPA TUB**

Step 1. Remove the two screw cap covers

Step 3. Open the filter lid to access the filter chamber

Step 2. Undo the two screws to release filter lid

Step 4. Unscrew the two filters and replace with the new filters and rescrew into position

Change a floating Wier style skimmer filter

IMPORTANT: SWITCH OFF ELECTRICAL SUPPLY BY DISCONNECTING THE PLUG AT THE SOCKET OR ISOLATION SWITCH. Please contact a qualified electrician if you need assistance or contact us at Canadian Spa.

Step 1. Removing the basket and filter can be done with or without water in the spa/hot tub (Tip: when lifting filter from water have a net or sieve in hand to catch any residual dirt).

Step 2. To lift basket turn counter-clockwise until the flat part of the basket aligns with the flat part of the filter housing

Step 3. Lift out the basket

Step 4. Remove the old filter

Step 5. Replace with the new filter

Change a Wier style skimmer filter

Step 1. Remove the filter cover by sliding up the front plate

Step 2. Remove the filter tray in order to access the filter compartment.

Step 3. Remove the old filter(s) by unscrewing them

Step 4. Replace with the new filter(s) and rescrew filter(s)

Step 5. Ensure the filter tray fits in between the runners and slides back in place. **Note:** Follow the same process for a single port filter.

NOTE FOR SWIM SPAS:

Change the two filters stacked one on top of each other. Bottom filter is threaded and the top filter is push fit

**TIP: CLEANING YOUR FILTER**

It is advisable to clean your hot tub filters every 2 or 3 weeks.

- Turn off spa power
- Remove the cartridge from the filter housing and use a garden hose or a tap to wash down the filter. Rinse until all dirt and debris have been removed.
- Dissolve 250 gms of Canadian Spa Filter Free in 10 litres of luke warm water (one capful holds approximately 30 gms). USE A PLASTIC PAIL AND MIX UNTIL THE SOLUTION TURNS RED (ALWAYS READ THE LABEL). Soak the filter cartridge

for at least 1 hour (overnight is recommended).

- Rinse the cartridge again after cleaning to remove any traces of cleaning solution.
- Always dry the filters before inserting them back into your hot tub. This ensures that the filters perform to their best and last longer. Let them dry naturally. It is also a good idea to keep a spare set of filters.
- Do not run spa without filters
